Index of Subjects

Aeromonas salmonicida, genetic diversity of atypical, studied by pulsed-field gel electrophoresis, 299
African horse sickness in Portugal: a successful eradication programme, 337
Amblyomma hebraeum, prevalence of *Cowdria ruminantium* infection in, ticks from heartwater-endemic areas of Zimbabwe, 309

***Bartonella* spp.**, serological evidence of, infection in the UK, 233
Bordetella pertussis surveillance in England and Wales: 1995–7, 403
Buffaloes, evaluation of antigen detection and antibody detection tests for *Trypanosoma evansi* infections of, in Indonesia, 149

Calicivirus, an outbreak of, associated with consumption of frozen raspberries, 469
Calicivirus, transmission of, by a foodhandler in the pre-symptomatic phase of illness, 475
Campylobacter coli, phage typing of *Campylobacter jejuni* and, and its use as an adjunct to serotyping, 47
Campylobacter jejuni, phage typing of, and *Campylobacter coli* and its use as an adjunct to serotyping, 47
Chlamydia trachomatis, the duration of human ocular, infection is age dependent, 479
Cowdria ruminantium, prevalence of, infection in *Amblyomma hebraeum* ticks from heartwater-endemic areas of Zimbabwe, 309

Diptheria is declining but continues to kill many children: analysis of data from a sentinel in Delhi, 1997, 209
Dogs, a rabies serosurvey of domestic, in rural Tanzania: results of a rapid fluorescent focus inhibition test (RFFIT) and a liquid-phase blocking ELISA used in parallel, 157
Ducks, salmonella infection in a commercial line of; Experimental studies on virulence, intestinal colonization and immune protection, 121

Ear, middle, effusion: rate and risk factors in Australian children attending day care, 57
***Escherichia coli* O157**, an international outbreak of Vero cytotoxin-producing, infection amongst tourists; a challenge for the European infectious disease surveillance network, 217
Escherichia coli, characterization of enteroaggregative, isolated from outbreaks of diarrhoeal disease in England, 413
Escherichia coli, molecular epidemiological study on tetracycline resistance R plasmids in enterohaemmorrhagic, O157:H7, 25
Escherichia coli, molecular typing methods to investigate transmission of, O157:H7 from cattle to humans, 17
Escherichia coli, outbreaks of enterotoxigenic, infection in American adults: a clinical and epidemiologic profile, 9
***Escherichia coli* O157:H7**, prevalence of, in range beef calves at weaning, 291

Foxes, epidemiological analysis of *Trichinella spiralis* infections of, in Brandenburg, Germany, 139

Gastroenteritis, trends in hospitalizations associated with, among adults in the United States, 1979–1995, 1

Hepatitis A, lack of evidence for increased risk of, infection in homosexual men, 89
Hepatitis B, risk factors for monoinfections and coinfections with HIV, and hepatitis C viruses in northern Spanish prisoners, 95
Hepatitis C, risk factors for monoinfections and coinfections with HIV, hepatitis B and, viruses in northern Spanish prisoners, 95
Hepatitis C virus, household members of, -infected people in Hafizabad, Pakistan: infection by injections from health care providers, 515
Hepatitis, prevalence of, B, D and C virus infections among children and pregnant women in Moldova: additional evidence supporting the need for routine hepatitis B vaccination of infants, 463
Hib immunization, the, programme in the Oxford region, an analysis of the impact of vaccine administration on the incidence of disease, 389
HIV, completing the molecular investigation into the, outbreak at Glenochil prison, 277
HIV, intestinal protozoa in, -infected patients in Apulia, South Italy, 457
HIV, risk factors for monoinfections and coinfections with, hepatitis B and hepatitis C viruses in northern Spanish prisoners, 95
HIV-1, simulation studies of phase III clinical trials to test the efficacy of a candidate, vaccine, 65

Influenza A among community-dwelling elderly persons in Leicestershire during winter 1993–4; cigarette smoking as a risk factor and the efficacy of influenza vaccination, 103

Lambs, determination of farm-level risk factors for abnormalities observed during post-mortem meat inspection of: a feasibility study, 109
Lasagne, an international outbreak of *Salmonella enteritidis* associated with; lessons on the need for cross-national co-operation in investigating food-borne outbreaks, 31
Leishmania infantum, the potential of Latent Class Analysis in diagnostic test validation for canine, infection, 499

Mayaro virus, determination of natural versus laboratory human infection with, by molecular analysis, 511
Measles, the effect of timing of sample collection on the detection of -specific IgM in serum and oral fluid samples after primary measles vaccination, 451
Melioidosis, acute, outbreak in Western Australia, 437
Meningococcal disease at the University of Southampton: outbreak investigation, 185
Meningococcal disease, outbreak of, in western Norway due to a new serogroup C variant of the ET-clone: effect of vaccination and selective carriage eradication, 373
Meningococcal disease, predicting the course of, outbreaks in closed subpopulations, 359
Meningococcal, salivary antibodies following parenteral immunization of infants with a, serogroup A and C conjugated vaccine, 201
Meningococcus, seven-week interval between acquisition of a, and the onset of invasive disease. A case report, 507

Neisseria meningitidis, antimeningococcal herd immunity in the Czech Republic—influence of an emerging clone, ET-15/37, 193
Neisseria meningitidis, carriage of a new epidemic strain of, and its relationship with the incidence of meningococcal disease in Galicia, Spain, 349

Oysters, microbial quality of, sold in Western Trinidad and potential health risk to consumers, 241

Porcine cytomegalovirus, development of a PCR system for, detection and determination of the putative partial sequence of its DNA polymerase gene, 177
Protozoa, intestinal, in HIV-infected patients in Apulia, South Italy, 457

Rabies, an update on safety studies of SAD B19, virus vaccine in target and non-target species, 165
Rabies, a, serosurvey of domestic dogs in rural Tanzania: results of a rapid fluorescent focus inhibition test (RFFIT) and a liquid-phase blocking ELISA used in parallel, 157
Rabies, phylogeographic patterns exhibited by Ontario, virus variants, 325
Respiratory syncytial virus, epidemiology of, infection among paediatric patients in Hong Kong: seasonality and disease impact, 257
Rubella, prevalence of antibodies against, virus in the Netherlands 9 years after changing from selective to mass vaccination, 263

Salmonella, application of ribotyping and IS*200* fingerprinting to distinguish the five, serotype O6,7:c:1,5 groups: Choleraesuis *sensu stricto*, Choleraesuis var. Kunzendorf, Choleraesuis var. Decatur, Paratyphi C, and Typhisuis, 37
Salmonella enterica, levels of virulence are not determined by genomic lineage of, serotype Enteritidis strains, 423
Salmonella enteritidis, an international outbreak of, associated with lasagne; lessons on the need for cross-national co-operation in investigating food-borne outbreaks, 31
Salmonella enteritidis, electronic network for monitoring travellers' diarrhoea and detection of an outbreak caused by, among overseas travellers, 431
Salmonella infection in a commercial line of ducks; experimental studies on virulence, intestinal colonization and immune protection, 121
Schistosoma haematobium, planning chemotherapy based schistosomiasis control: validation of a mathematical model using data on, from Pemba, Tanzania, 487
Serpulina hyodysenteriae, analysis of, strain variation and its molecular epidemiology using pulsed-field gel electrophoresis, 133
Streptococci, epidemiological typing of bovine, by pulsed-field gel electrophoresis, 317
Streptococcus pneumoniae, nasopharyngeal colonization of infants in southern India with, 383

Toxoplasma, incidence of symptomatic, eye disease: aetiology and public health implications, 283
Trichinella spiralis, epidemiological analysis of, infections of foxes in Brandenburg, Germany, 139
Trypanosoma evansi, evaluation of antigen detection and antibody detection tests for, infections of buffaloes in Indonesia, 149
Tuberculosis, risk of transmission of, among inmates of an Australian prison, 445

Vibrio cholerae, molecular characterization of, O1 and non-O2 from human and environmental sources in Malaysia, 225
